RE: LOCKHEED MARTIN CORPORATION
ONSHORE ACTIVITIES ASSOCIATED WITH COW PEN
CREEK AND DARK HEAD COVE SEDIMENT
REMEDICATION
Stormwater Management Variance
Middle River Watershed
EPS Project I.D. M140194
EPS Tracking Number: 06-16-2146

Dear Mr. Myers:

This office has reviewed the information submitted and finds that a stormwater management variance can be granted for this project under Section 33-4-113 (a) (2) of Title 4 of the Baltimore County Code. This section of the regulations allows a stormwater management variance to be granted if there are exceptional circumstances such that strict adherence to the provisions of this article would result in unreasonable hardship or practical difficulty and not fulfill the intent of this article.

This project is for sediment remediation in Cow Pen Creek and Dark Head Cove. The areas onshore that will handle the sediment removed from the waterways will be returned to their original contours and cover conditions once the project is completed. Therefore, there will be no increase in the impervious area associated with this project and the rate and volume of runoff will not change.

Please contact Ed Schmaus of my staff at 410-887-3768 should you have any questions.

Very truly yours,

/signed/

Vincent J. Gardina, Director
Department of Environmental Protection
