RE: BGE LYNCH LANE
Stormwater Management Variance
Little Gunpowder Watershed
EPS Project I.D. M130321
EPS Tracking Number: 03-13-1743

Dear Mr. Taylor:

This office has reviewed the information submitted and finds that a stormwater management variance can be granted for this project under Section 33-4-113 (a) (2) of Title 4 of the Baltimore County Code. This section of the regulations allows a stormwater management variance to be granted if there are exceptional circumstances such that strict adherence to the provisions of this article would result in unreasonable hardship or practical difficulty and not fulfill the intent of the regulations. This project is for grading approximately 19,000 square feet to bring the clearance of the existing overhead transmission lines into compliance with current regulations. The existing cover conditions will be re-established once the grading is complete. Although the disturbed area is in excess of 5,000 square feet, there will be no net increase in impervious area or runoff as a result of this project.

Please contact Robert T. Wood, Jr. of my staff at 410-887-3768 should you have any questions.

Very truly yours,

/signed/

Thomas L. Vidmar, P.E., Deputy Director
Department of Environmental Protection
& Sustainability
