RE: CSX CULVERT MAINTENANCE PROJECT
Stormwater Management Variance
Liberty & Loch Raven Watershed
Project I.D. M130013
Tracking Number: 03-13-1593

Dear Ms. Cho:

This office has reviewed the information submitted and finds that a storm water management variance can be granted for this project under Section 33-4-113 (a) (2) of Title 4 of the Baltimore County Code. This section allows a storm water management variance to be granted if there are exceptional circumstances such that strict adherence to the provisions of this section would result in unreasonable hardship or practical difficulty and not fulfill the intent of the regulations. This project is for the installation of a 42 inch and 48 inch steel culvert by jack and bore method. The existing cover conditions will be re-established once the steel culverts are installed. Although the disturbed area is in excess of 5,000 square feet, there will be no increase in impervious area or runoff as a result of this project.

Please contact Lamar A. Lewis at 410-887-3768 should you have any questions.

Very truly yours,

/signed/

Thomas L. Vidmar, P.E., Deputy Director
Department of Environmental Protection
& Sustainability
