

Recreational Water Safety

From April to November, water samples are taken to determine water quality and public health risk.

When sample results fail to meet federal and state standards, the following precautions should be followed to keep you and your family safe.

View bathing beach and recreational water sample results online:
www.baltimorecountymd.gov/watersampling

Do **not** drink the water.

Direct contact with water should be avoided, especially if you have open sores or wounds.

If exposed to contaminated water, wash any exposed body areas with soap and water, especially hands before eating.
