

BALTIMORE COUNTY

MARYLAND

January 8, 2009

JAMES T. SMITH JR.

County Executive

Honorable Martin O'Malley
Governor, State of Maryland
100 State Circle
Annapolis, Maryland 21401-1925

Dear Governor O'Malley:

I would like to thank you for the opportunity to submit this list of potential Baltimore County infrastructure projects for possible funding through the federal economic recovery package. We share the State's hope that a timely infusion of federal funding will provide meaningful relief by protecting and creating jobs while simultaneously improving the County's infrastructure.

The attached master listing includes specific public works infrastructure projects that could be in the advertising phase within six months totaling approximately \$26 million and bulk category projects (e.g., resurfacing, concrete replacement, alley rehabilitations, etc.) that could be in the construction phase within six months totaling approximately \$96.5 million. Moreover, the list includes approximately \$47.3 million in Baltimore County School construction projects requested in the County's FY 10 State School Capital Budget Request that could be in the construction phase within six months.

For your convenience, I have included additional attachments to itemize bulk category and school projects. Although some of the specific public works projects are transportation related, these do not impact the County's CTP submitted to the State.

Thank you for your consideration of these projects as a part of the State's likely approach to programming the additional federal funding made available. Should you have any questions or would desire additional information, please contact my office.

Sincerely,

James T. Smith, Jr.
County Executive
