

BALTIMORE COUNTY GOVERNMENT  
DEPARTMENT OF PUBLIC WORKS  
INTER-OFFICE CORRESPONDENCE

**DATE:** December 28, 2016

**TO:** Steven A. Walsh, PE, Director  
Department of Public Works

**FROM:** Thomas Kiefer, PE, Chief   
Bureau of Engineering & Construction

**SUBJECT:** 2017 Basic Services Maps  
Public Water and Sewer Status

---

In accordance with your request, we are furnishing an update for the 2017 Basic Services Map.

Water

No deficiencies are known to exist.

Sewer

Sanitary Sewer Overflows (SSO) #36 (Overbrook & Banbury), #37 (Anneslie Road) and #106 (Croydon Court) have been monitored and have been closed. The areas of concern upstream of SSO #36, #37 and #106 have been removed from the Basic Services Map.

All of the remaining sewer relief point locations are being metered. We have completed several rehabilitation projects and are now performing post-monitoring to determine the projects' effectiveness. In addition, we have projects still in design which will eventually eliminate the areas of concern.

Everyone should be aware that the removal of an area of special concern does not mean that an area has unlimited developmental potential. All developments are evaluated hydraulically on a case-by-case basis, and determinations are made to see if the development will need downstream supplementation.
